

Situation

WiseConnect is a nationwide provider of telecommunications services, employing a large network of technicians across the country for major telecommunications providers.

WiseConnect is 100% private equity owned and is focused on growth driven initiatives.

Result

50 hours/month

of manual tasks eliminated,
subsequently creating time
for value-add work

Challenge

The time consuming, manual processes needed to gather and connect data for payroll, billing, and reporting led to an inefficient back-office process.

Constant 'busy work' left little time for value-add work to move the business forward at the desired rate.

Action

Connected 5 disparate systems; each used to manage a separate function of the business.

Automated billing/payroll tasks, routine journal entries and weekly/monthly financial package.

"Our company has seen rapid growth. This has come organically by launching new markets and introducing new offerings. BUCS has provided the visibility for us to grow with confidence. Our decision makers have the information they need to execute. Additionally, BUCS has enabled us to execute with minimal incremental resources."

Tom Mohl
CEO

wise**CONNECT**

Systems Integrated

BUCS launched the first version of our platform in 2016 to help mid-market companies improve performance through better information. This idea has blossomed into an end-to-end data management platform used by high-growth organizations, private equity firms, and top professional service firms. They rely on our platform to drive efficiency and increase decision velocity, resulting in value creation greater than 5% of revenue.
