

Situation

Arcane Capital Partners is an emerging private equity firm based in Little Rock, Arkansas. Arcane manages four portfolio companies with operations spanning multiple locations.

Arcane continues to actively seek expansion opportunities and specializes in strategic acquisitions and investments

Challenge

All four portfolio companies had a different chart of accounts and were operating on different, lesser-known ERP systems.

This diversity impeded data retrieval for timely, informed decision-making.

Further, it created challenges in efficiently creating consolidated financial statements.

Action

Connected to four ERPs from four different companies to provide a range of reporting options, from granular transaction line reporting to consolidated financial statements.

Provided direct access to a variety of data tables, including consolidated general ledgers and trial balances, that can be refreshed at the client's discretion through the Data Feed in Excel.

Developed multiple automated reports on sales reporting for daily usage by the Arcane executive team

Systems Integrated

x2

Result

7 days

from connections to consolidated trial balance

40+ hours

of manual time cleansing and combining data in Excel eliminated every month

BUCS allowed us to connect multiple systems from different companies across varying industries in no time at all. The pre-built connectors were a breeze to use, but the more amazing experience was the team's ability to connect to systems where they didn't have pre-built connectors. They had custom connections up and running in matter of a few days and we instantly had a data lake and consolidated financials. This instantly enabled our team to see real-time data and has enabled us to make better informed decisions more quickly.

Eric Chin
Chief Information Officer

BUCS launched the first version of our platform in 2016 to help mid-market companies improve performance through better information. This idea has blossomed into an end-to-end data management platform used by high-growth organizations, private equity firms, and top professional service firms. They rely on our platform to drive efficiency and increase decision velocity, resulting in value creation greater than 5% of revenue.
