

# BUCSanalytics for business insights

Make timely, data-driven decisions and move forward with confidence.

There are countless factors that impact the performance and profitability of your business. BUCSanalytics empowers you to integrate data from across your disparate business systems to provide both big-picture as well as tactical insights.

## Turn your data into powerful knowledge and actionable insights.

The BUCS platform is cloud-based and can be deployed in days. Quickly leverage data from your ERP, CRM, payroll, inventory and production systems to provide key business insights including:

- Sales and profitability
- Cycle times and chain of events
- Working capital management
- Customer performance
- Vendor evaluation
- Product and service profitability

## Proven results from data-driven decisions

**45%**  
sales increase

Improved customer satisfaction with timely and complete service driving quantifiable increase in sales activity.

**\$300k**  
software investment savings

Provided greater visibility and integration of current system data rendering an investment in a new MRP system unnecessary.

**32%**  
inventory reduction

Conducted working capital analysis driving greater interconnected visibility across the supply chain resulting in more efficient inventory utilization.

**50 DAY**  
improvement in cash cycle

Timely visibility to work-in-progress allowed bottlenecks to be identified and addressed resulting in increased customer satisfaction and substantially improved cash cycle.

# THE DIFFERENCE is in the data

**BUCS delivers actionable insights, quantifiable benefits and answers to even the most challenging business questions.**

The BUCS methodology ensures data is available when needed and aligned to financial reporting while also linking data at the transaction line-item level – from sales order to cash receipt or from purchase order to cash outlay. This creates a single source of truth to keep sales, operations and finance on the same page.

## Clients leverage the BUCS platform to:

- Improve equity value
- Generate working capital improvements
- Increase profitable sales volume
- Reduce analyst costs
- Guide inventory reduction
- Improve service to customers
- Shorten lead times

## Features built for business

The BUCS platform offers out-of-the-box data integration and performance visibility as well as customizable reports and analysis.

- Drill down to individual record level
- Explore data in visual and tabular views
- Automate regular reports and analysis
- Create custom alerts and notifications
- Access your cloud-based insights anywhere
- Alerts and report delivery to the right person at the right time
- Take advantage of regular platform updates

**You have the data. Now get the insight to execute with confidence**
